Aeon Dynamics — R&D Readiness Checklist

Determine if your business is sitting on unclaimed R&D funding.

- ■ Have you built or prototyped anything without a predefined blueprint or user manual?

- ■ Do you employ engineers, software developers, or technical staff solving novel problems?

- ■ Have you spent over $20K on internal labour, materials, or cloud infrastructure in the past financial year?

- ■ Can you identify 1-2 people responsible for solving operational or technical challenges?

- ■ Have you had to run trial-and-error, simulations, or field tests to reach a viable outcome?

- ■ Are you documenting what your tech team is building, even informally?

- ■ Have you delivered something that required building new logic or process from scratch?

- ■ Have you been rejected or ignored by traditional grant writers or consultants?

- ■ Are you using AWS, Azure, or GCP to run infrastructure you designed or configured?

- ■ Do you want to claim up to 43.5% of your R&D spend without giving up equity or control?
